

## An alternative to OCSInventory-Agent, featuring:

- ▶ A unique agent for all platforms
- ▶ Unprecedented collection of informations (battery, antivirus, hard drive serial and more)
- ▶ Wake on Lan
- ▶ Local inventory using an agent or remote using **SNMP** (for switches and printers)
- ▶ Software deployment throught peer to peer: download archive once for the whole network!
- ▶ **HTTPS** support for inventory and software deployment
- ▶ Native support for **UTF-8** character encoding
- ▶ Windows support with **64bit software** inventory
- ▶ Network discovery
- ▶ Ready to use packages available for several Operating Systems

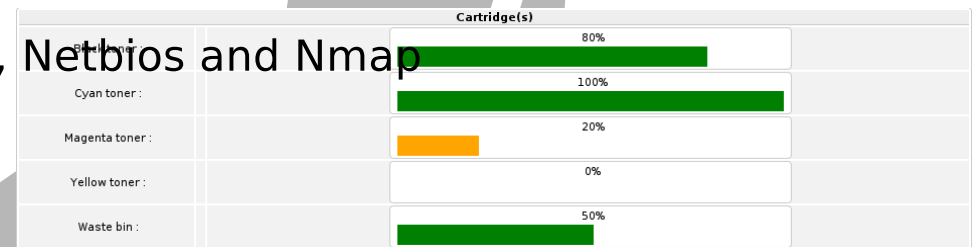

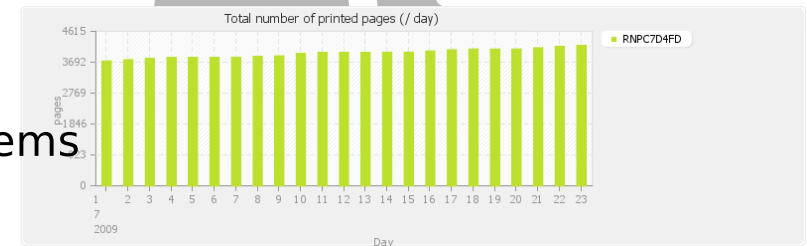

# FUSION INVENTORY

## A plugin for GLPI:

- ▶ Powerful network discovery within GLPI using SNMP, Netbios and Nmap
- ▶ Easy way to wake computers up (Wake On Lan)
- ▶ More than **1000** SNMP network devices supported

## And much more:

- ▶ A PHP library acting as an OCS server
- ▶ An active mailing list and an IRC channel
- ▶ An open community : users, developers and several interested projects (Shinken, GOsa<sup>2</sup>, Unattended-GUI), you?
